RE: Technical Changes to Production Measurement
And Training Requirements, 1010-AD50

Dear Sir/Madam:

The proposed NTL changes the definition of the production safety regulations that are currently in effect. We believe that the current NTL No. 2008-N03 is well suited to the production safety and training regulations. The change in the definition would be difficult to apply in practice. It is unclear how our training procedures should be changed to comply with the new definition.

Sincerely,

RIDGELAKE ENERGY, INC.

John V. Rubin
Vice President – Petroleum Engineering
