

Peter Goldman

Mr. Goldman is currently the Director of the Office of Wind and Geothermal Technologies at the U.S. Department of Energy. He provides overall management and guidance to a team of engineering and scientific experts at the Department's national laboratories, and represents the Department through interaction with private and public sector stakeholders. Mr. Goldman is a graduate Civil Engineer from the Virginia Military Institute. Prior to his work at the Department of Energy, Mr. Goldman held engineering and program management positions with the Federal Aviation Administration and the Federal Energy Regulatory Commission.

The mission of the Office of Wind and Geothermal Technologies is to work in partnership with U.S. industry to establish wind and geothermal energy as economically competitive contributors to the U.S. energy supply. Both programs conduct research, development and deployment activities to help the United States attain the economic, environmental, and energy security benefits of expanding the domestic use of wind and geothermal energy.
