

Bio for Dr. Arthur M. Hartstein

Dr. Arthur M. Hartstein has conducted and managed research and development on energy and environment topics for over 31 years. He conducted environment, health, and safety research for the US Department of Interior's Bureau of Mines, specializing in underground coal mine issues.

He was responsible for developing monitors for the underground detection of Nox, CO, and H₂S. While with the Department of Energy, he has managed the oil shale, tar sands, and underground coal gasification programs. He is currently managing the Department's oil refining, gas processing, and gas to liquids programs. He has a B.S. in Chemistry from Polytechnic University, New York, New York and a Ph.D. in Physical Chemistry, from Adelphi University, Garden City, New York. Dr. Hartstein served in the U.S. Army, Corps. Of Engineers and recently retired with the rank of LT. Colonel. He is married and has two daughters.
