

## **CITATION**

### **NATIONAL SAFETY AWARD FOR EXCELLENCE**

#### **Kerr-McGee Corporation**

The Department of the Interior's Minerals Management Service presents its 1996 National Safety Award for Excellence (SAFE) in the category of "Major or Large Operator" to the Kerr-McGee Corporation. This award recognizes Kerr-McGee for an outstanding performance while conducting oil and gas production operations on the Outer Continental Shelf of the United States of America.

Kerr-McGee qualified for the 1996 National SAFE Award by being selected as recipient of the Houma District SAFE Award for production operations in the Ship Shoal Block 300 area of the Gulf of Mexico Region. During the MMS annual inspection by Houma District MMS inspectors, no failures were observed nor were any devices found out of test range. Kerr-McGee was also cited for its exemplary Safety and Environmental Management Program (SEMP). Kerr-McGee employees were well trained, cooperative, safety conscious, and knowledgeable of the operating requirements.
