

## **CITATION**

### **NATIONAL SAFETY AWARD FOR EXCELLENCE**

#### **Mesa Limited Partnership**

The Department of the Interior's Minerals Management Service presents its 1996 National Safety Award for Excellence (SAFE) in the category of "Independent or Small Operator" to the Mesa Limited Partnership. This award recognizes Mesa for an outstanding performance while conducting oil and gas production operations on the Outer Continental Shelf of the United States of America.

Mesa qualified for the 1996 National SAFE Award by being selected as recipient of the Houma District SAFE Award for production operations in the South Pelto Block 13 Field of the Houma District of the Gulf of Mexico Region. During that year, there were no incidents of noncompliance noted and no lost time accidents in the field since 1984. The training, maintenance, and housekeeping are exemplary. Complete and accurate records are kept by personnel who recognize the importance of our mission and assist in the conduct of a thorough and timely inspection.
