18. SUPPLEMENTARY NOTES		
19. KEY WORDS (Continue on reverse side if necessary and identify by block number) Submersibles Tethering Underwater Tools Underwater Vehicles		
20. ABSTRACT (Continue on reverse side if necessary and identify by block number) This report discusses the technology required to develop unmanned free-swimming submersibles to be used for inspecting undersea pipelines and structures. Of particular concern is the use of solid-state electronics and microprocessor technology. The philosophies concerning performance criteria, design flexibility, man/machine interface, and cost are discussed, and the vehicle's performance in these areas is evaluated.
